

# THE SAFETY ZONE OCTOBER 2006 M.S.A.P.

REPORT Brenda Heck-Safety Director

It was Friday, October 6, 2006 and two classes were taught in The Storefront East School. The comments from the School were minimal to the comments I received in the form of a Thank you note from the students. Comments from School: "Brenda Heck was very informative. The timeliness of the presentation right before Biketoberfest was perfect. I was fascinated by the number of blind spots in a vehicle. It is staggering, the number of deaths of motorcycle riders." Cathy Boyle, classroom teacher. "Thank you for taking time to speak with our students.

Today's students really need the information you provided." Dr. Tucker. Comments from Note: "Thanks for taking your time to teach us about cycle safety.", "Thank you Biker Chick", "I want to thank you for your inspiring presentation you have dedicated your time to the community which is a grateful attribute to you. Motorcycle safety is a very important issue and should be brought up more frequently. I have lost an uncle to a <suicycle> as my grandpa would say, and it hurts enormously. Continue informing the youth it helps. Thanks again. Colin James. (This student I thought I'd have the worst time with but that just goes to show me I can't judge that book by it's cover or punkiness!!), "I wanted to be a Biker for awhile and thanks to your presentation I will right after I graduate."

Our next class is NOVEMBER 17, 2006 at PINE RIDGE HIGH SCHOOL. 9:21A.M.-2:45P.M. Come join me, I dare you to make a difference!!!! This is the real deal people, this is what's going to save lives.....maybe your own!!!! I WILL NEVER KNOW HOW MANY LIVES WE'VE SAVED BUT I KNOW WE'VE TRIED..

If you would care to share with our classes call me at 386-252-1608 or e-mail me at DAYTONA32118@BELLSOUTH.NET. You won't regret it. I promise you. I can't do this by myself, it takes our stories and experiences to make this happen.

Now on a personal note, I had surgery on my right eye September 13th and everything is fine. I will have my left eye done on October 18th and I am hoping for the same results. I was without sight in my right eye for about a year but they rebuilt me!!
